

DIGITAL VOICE LOGGERS MULTIMEDIA RECORDERS

**Simply the Best Value on the
Voice Logging Market Today!**

**SCREEN RECORDING INCLUDED AT
NO ADDITIONAL COST**

The two models of Revcord Voice Logging System utilize the same software and offer the same functionality.

The model MCS is designed to provide “mission critical” redundancy with dual hot swappable hard drives (RAID 1, RAID 5 Optional) and dual hot swappable power supplies in a rack mount chassis. The model CYA is a tower chassis designed for applications where budgets are constrained and gaining the

best value for your dollar is of primary concern.(Internal RAID 1 Optional)

Each model is available with up to 168 analog or 168 digital channels-or a mix of analog and digital in combination with up to 300 “Channels” of Revcord’s VoIP solution. Multi-location enterprise Revcord systems are also available on special order.

With Revcord’s “all inclusive” package there are no add-on seat licenses or additional charges. ANI/ALI search, live monitoring, statistics, Evaluation and Grading software and other features are included in our pricing. Give the Revcord dealer serving the Public Safety community in your area a chance to prove why we say we’re, “SIMPLY THE BEST VOICE LOGGING VALUE ON THE MARKET TODAY!”
